

Brainstorming & Idea Prioritization Template

Date	4 July 2026
Team ID	
Project Name	Comprehensive measure of well-being
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Idea / Suggestion	Category	Group No.
1	Build a Linear Regression model to predict global HDI using health and education statistics	Machine Learning/Predictive Analytics	1
2	Create a Flask web app for users to simulate socioeconomic changes on well-being scores.	Web Application/User Interface	2
3	Build an automated pipeline to handle missing values and inconsistencies in global data.	Data Engineering/Preprocessing	3

4	Generate correlation heat maps to find which metrics have the highest impact on well-being.	Data Visualization/EDA	4
---	---	------------------------	---

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	Predictive modelling of HDI using Linear Regression	High	High	1	Yes
2	Web application interface to display realtime userdriven HDI calculations.	High	High	2	Yes
3	Automated data preprocessing and interpolation pipeline for global metrics.	High	High	3	No
